Power and Switch Location

GRAI
Infra-Black Strip Heater

Note: View is from the top.

Power: Numbers indicate potential power locations.
- "X" indicates that the power location is on the side of the warmer.

Switch: There are only two switch location options for this model: on the front of the built-in control box, either on the left or right.
Models with built-in control box must have the power location at the end of the control box – either location "left" or "right" depending upon which control box location you choose.

Note: Remote controls are available and recommended.
